

Flowtration Station

A Vegetable Oil Fueling Station

Are You A Diesel Driver?

Driver Benefits:

- **Time:** Save refueling time by fueling up where food is delivered & consumed.
- **Money:** Save cash through convenient fuel-up, VO prices lower than diesel prices (pending a Carbon Fee & possible diesel retrofit tax credits upon Federal approval with standards testing).
- **Machinery:** Reduce the wear & tear of your vehicle through VO fuel's increased lubrication and detergent properties (also pending Federal approval with standards testing).
- Approx. 800 conversions available worldwide for millions of vehicles.

Environmental Benefits:

Easy oil change for convenient response to climate change

- Reduces Emissions
 - Processed cleanly, safely, inexpensively, and passively anywhere.
 - The plants used to make the fuel, grow back consistently as a renewable resource.
 - Carbon-Neutral (plants absorb more carbon as they grow than their oil emits when used as fuel).
 - Neither requires nor produces chemicals in production, unlike Biodiesel.
- Cuts the waste-oil-to-renderer-to-biodiesel-to-petrol-blend-fuel loop.
- Reduces Fats Oils Greases (FOG) - Major EPA goal
