

Flowtration Station

A Vegetable Oil Fueling Station

Are You A Restaurant Owner?

Restaurant Benefits:

- Based upon volume of waste VO, you'll likely have immediate ROI with our leasing option.
- Operations friendly - restaurant worker pours waste cooking oil into station and the station will do the rest.
 - no extra work necessary
- User friendly - customers fuel up just like they would at a normal gas station.
- Reduces renderer/ hauler's pickup & grease trap frequency.
- Reduces haul truck drivers' delivery costs via food delivery endpoint fuel up.
- Ensures waste cooking oil isn't drained into sewer pipes.
- Off-grid optional, so the station can be located on outside perimeter of fast-food drive-thru.

Environmental Benefits:

Easy oil change for convenient response to climate change

- Reduces Emissions
 - Processed cleanly, safely, inexpensively, and passively anywhere.
 - The plants used to make the fuel, grow back consistently as a renewable resource.
 - Carbon-Neutral (plants absorb more carbon as they grow than their oil emits when used as fuel).
 - Neither requires nor produces chemicals in production, unlike Biodiesel.
- Cuts the waste-oil-to-renderer-to-biodiesel-to-petrol-blend-fuel loop.
- Reduces Fats Oils Greases (FOG) - Major EPA goal
